

JEZREEL HOUSE FOR BOYS

PROJECT COST \$20,000

Building Project —

Jezreel, translates to Spanish as “God plants.” At *Jezreel House for Boys*, the Word of God is planted into the hearts of the boys in the home. Currently this program is situated in a two-room brick building which houses 9 boys and 2 adults. A few times, when the numbers have risen, bed space has been supplemented by hammocks. A project has been initiated to build a one-story, ranch-style house with space available for 25 boys and 2 supervisors. Bathrooms and laundry will be housed in a separate building, which is common in the area.

Jezreel House Program —

The program is operated on a farm for adolescent boys—abandoned, troubled, living in the streets—to get their hands in the dirt and not in drugs and to get their hearts and lives closer to God.

Ultimately, the program would like to include a small engine repair shop and other occupational aids to prepare the boys to meet any challenge in life.

Right now there are plenty of fields for crops and wooded areas to clear, which is all done with ax, pick, and machete. An area of about 30 acres keeps them busy. A Proverb, paraphrased in *The Message* says, “First plant your fields, then build your barn.” The field has been planted now with nine boys in the home. It is time to build the “barn.”

We invite you to join us in being a vital part of this program by providing the funds to build the larger home so that the accommodations are adequate for the program and room is available for more boys to be given opportunity for hope and a future.
